XM Instant Traffic and weather is a fantastic and inovative service. XM Instant Traffic and Weather gives XM Radio the local flavor that it needs to thrive in todays competative market. XM Instant Traffic and weather is not just traffic for the masses but it can help people on a personal level. For example, later this year XM will instoduce XM NAV traffic. NAV traffic is supposed to be an inovative system that will automatically communitcate with a driver's in car navigation system to route the driver around traffic jams guiding him or her to the desired destination quickly, esily and saftly. XM's Instant Traffic and weather service is very new and has a potential to be even greater then it alreay hes proven to be. Satalite radio Traffic Channel do not need to be turned off, they need the help of government officials and the FCC to make the service even better.
